Courtney:

I have verbal results from the lab on the helipad samples for J. Christiansen on Tuesday. They are as follows:

CS-18666 Field E. of Bldg. - TRACE
CS-18667 Field E. of Bldg. - TRACE
CS-18668 Field E. of Bldg. - TRACE
CS-18669 Field E. of Bldg. - TRACE
CS-18670 Field E. of Bldg. - TRACE
CS-18671 Field E. of Bldg. - TRACE

CS-18672 Field E. of Bldg. - <1% (analyst says on "low end")

CS-18673 Field E. of Bldg. - ND
CS-18674 Field E. of Bldg. - ND
CS-18675 Field E. of Bldg. - ND
CS-18676 Field E. of Bldg. - ND
CS-18677 Field E. of Bldg. - ND
CS-18678 Field E. of Bldg. - ND
CS-18679 Field E. of Bldg. - ND
CS-18680 Field E. of Bldg. - ND

Brian Pyles was the sampler on this project, so I will ask him to designate the specific areas to pinpoint the "TRACE" and "<1%" areas for easier identification.

Patty

Hello again Stacy,

Don't mean to "bombard" you with requests. But the below samples are PRIORITY over any others. These are results that will be reported to Jim Christiansen who is the head of our regional EPA district. Andy Gordon

11/5/2004

- Areas A-J had visible vermiculite throughout grids.
- Areas K-P had no visible vermiculite.
- Area Q
- Gravel Road on North end of Field has gross visible vermiculite along the side (North) of road and in Road.
- Area R was not sampled. Does not belong to hospital.

Grids B-m are 100' x 100'
Grids O-P are 75' x 150'
